Cracking the code on how to decipher Lyme symptoms and treat them with pure, effective, safe and easy to learn psychological intervention.

By applying these simple methods, healing is often possible where conventional and alternative methods have failed. ★

From the text: Memories stored in the Limbic System represent emotional realities and not necessarily the objective external reality. It is the internal reality which causes illnesses, not the external one. Aside from our treatment there are other examples of memories, e.g. of the birth process that were 100 percent accurate and could be confirmed by witnesses. However we also experienced spontaneous remissions of patients whose memories during the treatment lead to their recovery that were not accurate.

Illnesses have four components: a psycho-emotional component, an electromagnetic component, a structural component, and a biochemical component. We have found one or more unresolved conflicts with any illness. Frequently the treatment of the psycho-emotional conflict will balance the other three components. **Advanced APN 2016**

Learn these practical yet powerful tools and explore the most frequent hidden causes of chronic illness: symptomatic Lyme disease (later in life), hypertension, heart disease and stroke, type 1 and II diabetes, insulin resistance, cancer, chronic fatigue, chronic pain, chemical sensitivity and others *Unresolved trans-generational ancestral trauma in the client's family.*
