

Advanced Autonomic Response Testing Course

Level 3: June 24-26, 2016
Bastyr University, Kenmore WA

Description and Schedule:

Refresher Workshop; Fri: 9 am – 12 noon

Day 1 Fri: 1pm- 9 pm

Day 2 Sat: 9am – 6:30 pm

Day 3 Sun: 9am – 1pm

Using the science and the magic of Autonomic Response Testing

AR Testing is an extension of the hands-on physical exam utilizing reflexes in the autonomic nervous system. It is used in conjunction with a good physical exam, lab work and imaging studies. It gives the practitioner an additional superb tool to help plan interventions, establish treatment protocols, and make better choices and decisions for the health and recovery of our chronically ill patients

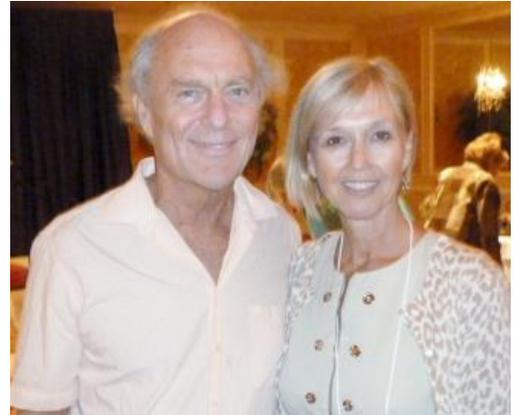

Level I and 2 are the hands-on workshops in which the principles and the skill of ART are taught: open and blocked regulation, switching, the 7 factors, the 5 levels of healing, the work with the signal enhancer and the polarization filter. **LEVEL 3** is the workshop where the system is put into practice, addressing most relevant acute and chronic illnesses of our time: CFIDS, fibromyalgia, Lyme disease, autism, acute infections, trauma, PTSD, orthopedic problems, EMF sensitivity, sleeping disorders, MS, ALS, PD, AD and more.

Friday June 24: Pre-Seminar catch-up workshop 9am – 12 noon

(Andreanna Rainville RN, LMP): the principles and practice of Autonomic Response Testing. This workshop is for the practitioners who have either taken LEVEL 1 and 2 and wish to hone down their knowledge and skills - or those of you who come from another school of energetic testing, have reviewed the videos of LEVEL I and II and feel ready to jump in at this higher level. Hands on practice sessions. Bring your questions and come prepared with your test kits and clinical tools for hands on practice. We will have extra clinical products on hand for purchase.

Day 1 Friday, June 24: 1- 5:30 pm

Getting ready for ART III (Dietrich Klinghardt, MD, PHD)

Dietrich Klinghardt MD & Debbie Floyd
Director, Klinghardt Academy

In this morning workshop Dr Klinghardt will summarize and demonstrate the most important skills (and bits of knowledge) needed to enter ART III in a meaningful way: Mental Field Techniques, Psycho kinesiology, the testing in the field for intracellular and mitochondrial issues, using the opening angle to find hidden blockages, testing for dental issues: cavitations and infections, metal and plastic toxicity, bite problems and the relationship to venous outflow from the brain.

Friday: 6:30-9 pm

The hidden causes and ART tests for most neurological illnesses i.e. autism, PD, MS, ALS, CFIDS, Lyme, XMRV, HSV 1/2, EBV, etc.

In this section we will discuss the role of extra- and intracellular parasites, viruses, bacteria, mold, microbes in the triggering of chronic illness. We will also discuss the role of metals, environmental toxins and internally self-generated toxins in the perpetuation of the ill state. Each issue will be translated into simple and easy-to follow steps of ART testing.

Day 2: Saturday 9 - 1pm

A look beyond the cul-de sac of treating only with vitamins, anti-oxidants and/or pharmaceuticals. Introduction to the new thinking: most neurological illnesses are vascular illnesses, with microbes causing endothelial changes and pathology which ultimately causes the illness through changes in the fluid dynamics and the destructive results of that. The role of neck trauma, fetal trauma and birth trauma, medication given at birth, EMF and mold exposure, infections with Borrelia, mycoplasma, C.pneumoniae, XMRV, HHV-6 and other microbes, the role of poor dental occlusion will be discussed - always accompanied by demonstrations and with a focus on the often simple solutions.

Saturday 2.30 – 4:30 pm

Demonstrations and hands-on practice session.

Saturday 4:30 - 6pm: Special Afternoon Lecture

Day 3: Sunday: 9 - 1pm

Healing the brain: how to utilize ART and related insights to regain and improve brain health. How do we protect our brains from the onslaught of constant insults?

How is our brain health and what can we do about it? In this section we will explore the available science, personal observations and experience of mitigating the biological effects of EM exposures and heavy metal toxicity, the presence of microscopic parasites, Babesia, Bartonella and other unwanted guests in our brain. The brief talks will be spiced with demonstrations and the gift of effective, safe and often magical treatment protocols.

How to stop the brain from perpetuating the illness: tricks and insights to change the brain quickly and lastingly.

Precondition for ART III: bring your test kits and testing materials and an open mind, flexible brain and casual clothing! Also bring your own relevant lab work and imaging studies

This is an advanced workshop and is limited to those who have attended and mastered LEVEL I and LEVEL 2. If you would like to attend and have not been to a previous ART courses, please call Debbie Floyd at the Klinghardt Academy to certify registration.

As we update our referral list of qualified Autonomic Response Testing practitioners for the website, www.klinghardtacademy.com, we invite those interested to apply for certification testing with Director, Debbie Floyd via email, debbieafloyd@gmail.com. We would be pleased to be a referral resource to support our qualified practitioners.

We look forward to seeing you!

Warmest regards,

Dietrich and Debbie
